

**Table S2.** The best ratio(s) of measurements for species discrimination obtained via the PCA ratio spectrum, and the best three ratios for species separation in pairs, obtained via the LDA ratio extractor.

The PCA ratio spectrum	Ratio for PC1			Ratio for PC2					
Male	hemelytron length/vertex width (distance between eyes)			antennal segment 1/scutellum width					
	cuneus length/vertex width (distance between eyes)			–					
Female	scutellum width/antennal segment 1			–					
The LDA ratio extractor	Ratio no. 1			Ratio no. 2		Ratio no. 3
